Education

Yeshwantrao Chavan College of Engineering, Nagpur, Maharashtra Aug 2023 – Jun 2027
B.Tech in Computer Science, Minor in VLSI

Relevant Coursework: Cloud Computing, Operating Systems, Computer Networks, DBMS, Data Structures

Profile

Aspiring **CloudOps Engineer** with hands-on experience building and deploying **cloud-based backend systems** using Python, FastAPI, PostgreSQL, Redis, and Google Cloud Storage. Hands-on exposure to **AWS, Docker, Linux, Git, REST APIs, cloud monitoring, and cloud architecture**, with experience in usage metering, automation, and backend systems.

Experience

Founder – Gamesmania Feb 2024 – Present
Instagram-based Gaming Marketplace

- Built and managed operations for a gaming marketplace serving **1,000+ customers** and generating **INR 6L+ revenue** through organic customer acquisition.
- Managed customer lifecycle, service delivery, retention, conversion optimization, and **data-driven operational decisions**.

Intern – Lemon Ideas Innovations Pvt. Ltd. Jun 2025 – Jul 2025
Nagpur, Maharashtra

- Collaborated with early-stage startups on product design, market research, and digital growth strategies to address business requirements.
- Created high-fidelity UI/UX prototypes using Figma and performed competitor analysis to support **product roadmap decisions**.

Projects

Cloud Storage Usage Metering & Billing Engine **Python, FastAPI, PostgreSQL, Redis, AWS, Docker**

- Built a **cloud-based usage metering and billing platform** tracking **storage, bandwidth, and API consumption** with automated usage aggregation and billing workflows.
- Implemented **pricing calculations, analytical queries, automated PDF invoices**, and REST APIs using FastAPI and PostgreSQL.
- Containerized the application using **Docker** and deployed the FastAPI backend on **AWS EC2**; configured **CloudWatch** for application logs and monitoring.
- Integrated **Google Cloud Storage and Redis** for cloud-based file storage and efficient data handling, with authentication, RBAC, validation, and file integrity verification.
- Load-tested the API with 1000 requests / 10 concurrent users, achieving an average response time of **[Z] ms**.

ArchIntel **Python, Machine Learning, Computer Vision, NLP**

- Engineered **25 spatial and functional features** covering circulation, zoning, adjacency, and spatial syntax to quantify layout efficiency.
- Built an **LLM-powered assistant** using RAG and rule-based workflows to interpret analytical metrics and generate recommendations.

AI-Powered Image Similarity Search System – Intel Unnati **Python, Deep Learning, FAISS**

- Engineered an image similarity retrieval system using **deep learning embeddings** for high-dimensional feature representation.
- Optimized similarity search using **FAISS indexing** and designed an end-to-end architecture integrating model inference and vector search.

Technical Skills

Cloud & Infrastructure: AWS, EC2, CloudWatch, Google Cloud Storage (GCS), Cloud Architecture, Cloud Computing
DevOps & Systems: Docker, **Linux**, Shell Scripting, **Git, GitHub**
Backend & APIs: FastAPI, **REST APIs**, React.js
Programming: Python, Java, SQL, PL/SQL, C
Databases: PostgreSQL, MySQL, Oracle Database, **Redis**
Database Concepts: SQL Queries, Joins, Stored Procedures, Functions, Triggers, Indexing
Core Concepts: Data Warehousing, Data Analytics, Authentication, Role-Based Access Control
